**COAST TRAFFIC
SOLUTIONS**

SAFETY ~ SURETY ~ SATISFACTION

ABOUT US

WE ARE PASSIONATE, SOLUTIONS-FOCUSED AND COMMITTED TO ENSURING YOUR SAFETY IS OUR PRIORITY

Our handpicked team of contractors provide professional services with an emphasis on safe work environments. Our automated value chain includes the development of plans, application of permits (where required), placement of our crew, invoicing and reporting.

PUT YOUR TRUST IN US - CTS IS HERE TO HELP YOU EVERY STEP OF THE WAY

You can be assured of our collaborative approach with our clients and unwavering commitment to ensuring your safety. For your peace of mind and in the event of an emergency we are available 24 hours a day / 7 days a week.

OUR VALUES

At Coast Traffic Solutions our goal is to ensure your traffic management needs are met in a safe, sure, and satisfactory way.

SAFETY

Traffic and pedestrian management requires significant attention to the safety of people whether in a vehicle or on foot. At Coast Traffic Solutions we pride ourselves on the emphasis we place on safety.

Our traffic management plans are intricately designed to ensure we consider all safety elements of your requirements.

SURETY

When you secure Coast Traffic Solutions for your traffic management requirements you will not be disappointed. You can be certain that the highest standard of safety will be provided each and every time.

SATISFACTION

We pride ourselves on your satisfaction. Your satisfaction means our success. Whilst no two jobs are the same our commitment to delivering safe, reliable and efficient traffic management services is focused on ensuring our customers are satisfied.

OUR VISION

To be the premier traffic management company, setting the standard for excellence in managing traffic flow with precision, agility, and a relentless commitment to safety, enabling seamless movement and enhancing the urban experience for both people and vehicles.

OUR MISSION

Empowering safer journeys. Our mission is to optimise traffic flow through innovative solutions, fostering connectivity, safety, and sustainability for all road users.

WHY CTS

Our sites are professionally managed with safety integral to our success and your satisfaction. We are continually evolving our business model to ensure we deliver efficient and reliable service whilst improving the quality of our service offering. Underpinning our offering is the integration of our WHS standards with our automated allocating and planning model, subsequently enhancing our productivity. Working with Government, infrastructure, utilities, civil and residential construction companies and large event producers, no job is too large or small.

CAPABILITIES

SITE INSPECTIONS

When liaising with new clients or uncertain of particular locations, our team will undertake a site inspection to provide a comprehensive plan and quote. This level of service ensures your project needs are met. It's important when providing a Traffic Guidance Scheme our team of planners have a thorough understanding of your needs.

PERMIT APPLICATIONS

In order to interrupt the flow of traffic (either pedestrian or vehicular), a request must be made to the road's owner. Written permission is generally given to applicants by way of a Road Occupancy Licence (ROL) or letter of authority. This license will set out any special conditions, as well as the times and dates that work may be carried out on the roadways. Often there is a fee and/or a bond required by the road's owner. Coast Traffic Solutions will make the applications on behalf of our clients to obtain the necessary permits and ensure your project operates in accordance with local authorities.

TRAFFIC CONTROL CREWS

At Coast Traffic Solutions, our work sites are the front door to our client's businesses, therefore we ensure they are well presented through regular maintenance, accurate to plans and regulations and above all safe. All our employees are fully qualified and highly skilled and must hold the necessary licenses to work for Coast Traffic Solutions. Each new recruit must undertake an induction as delivered by a leading hand.

TRAFFIC GUIDANCE SCHEME

We pride ourselves on the quality of our Traffic Guidance Scheme (formerly Traffic Control Plan). Designed with the greatest level of detail, they are customisable and we ensure they provide a comprehensive overview of your requirements. Whether they be for vehicles, pedestrians or a combination, safety is our priority. Ensuring the effective placement and configuring of signage for your temporary requirements guarantees your project will meet the necessary standards and operate efficiently.

EQUIPMENT HIRE

Our equipment and signage can be hired short or long term. CTS vehicles are fully equipped to ensure your worksite is setup and managed according to the Traffic Guidance Scheme.

EVENT MANAGEMENT

We ensure your event management needs either traffic or pedestrian are implemented to the highest standard so you can ensure you guests have a safe yet memorable experience.

CLIENTS

MEET THE TEAM

JASON ANDERSON

Operations Manager

Jason has more than thirty (30) year's experience in the building and construction industry and as a licenced builder has owned his own company for the majority of this time. His works have covered residential, commercial and multiple dwelling developments and due to this broad scope has a thorough understanding of traffic management solutions to support such works.

He has worked in both NSW and QLD where he has gained an understanding of local Government requirements across multiple locations. Jason's company has managed multiple builds simultaneously which has required the ability to instruct and co-ordinate several trades, prioritise work orders, problem solve whilst maintaining a professional approach at all times. Jason maintains the following traffic management certificates:

- IMP – Implement Traffic Control Plans
- PWZ – Prepare a Work Zone Traffic Management Plan
- TCR – Traffic Controller

KATHERINE ANDERSON

Marketing Manager

Katherine holds a Masters in Marketing (Commerce) which has allowed her to hold multiple marketing, project management and event roles in her twenty (20) plus years career. Time management and client liaison are critical to the success of such positions.

With exceptional communication skills, she has been responsible for negotiating contracts, Government liaison, external contractor management, budget control as well as the development and execution of multi-faceted marketing strategies. She has held senior leadership roles, managing teams across multiple industries including large sporting organisations, real estate and financial services to name a few.

KRISTIE ZOLLER

Business Manager

Kristie boasts diverse project management experience with strong stakeholder engagement skills integral to the success of these projects. Having owned her own business she has realised the necessity of effective negotiation, consultation, and communication skills with both internal and external stakeholders eg: employees, suppliers, service providers etc.

More recently Kristie has developed in depth client liaison capability throughout a wide range of industries. Key attributes are adaptability to changing situations and work environments, commercially minded with proven ability in budget development and management.
